SUSTAINABILITY SUPERSTAR RESUME

BOTTEGA

Stewards of the Earth, in Every Bottle

CERTIFICATIONS

Equalitas Certification — the leading sustainability standard for Italian wineries.

FS & BRC Global Standard (AA level) certification for food safety.

Organic & Vegan certifications across select Bottega products.

Ecovadis Bronze Medal for overall ESG performance.

SQNPI certified, minimizing synthetic inputs and promoting sustainable agriculture.

COMMUNITY OUTREACH

Bottega Academy provides ongoing training and development, with 100% of employees hired under formal contracts and a strong focus on long-term employment.

Cultural and social giving supports the Slow Food Foundation for Biodiversity, university partnerships (IULM, Padova, Udine), and initiatives including Breast Health International, Wish for Japan, and housing and employment for Ukrainian refugees.

SUSTAINABILITY MEASURES

Achieves up to -99% CO₂ emissions vs. conventional energy through renewable systems, using 100% renewable electricity.

Geothermal air conditioning saves ~900 tons of CO₂ annually; continuous reduction of carbonfootprint from 3.19 to 2.25 kg CO₂ per liter.

18.5 million liters of water purified per year through internal systems, with 7 million liters saved per distillation cycle via recirculation.

Organic farming techniques eliminate ~1,000 kg of synthetic chemicals annually, with no glyphosate or PFOS residues.

Glass packaging contains **85–95% recycled content**, and labels are made from 90% ocean-recovered plastic.

20 tons of waste reused annually through the RafCycle project, reducing landfill impact.
